DRIVE AND CONVEYOR TECHNOLOGY

For smooth processes in many industrial areas, the drive and conveyor technology plays an important role.

Without these machines, there is literally not much going on in manufacturing companies. Whether conveyor belts, bucket elevators, carrier belts, driving pulleys, V-belts, toothed belts, rolling bearings, ball bearings, plain bearings, or sliding guides - they are all constantly moving or keep production processes moving and only work well with the right maintenance and care.

DRIVE TECHNOLOGY

Drive systems set machines and machine components in motion.

The drive technology focuses on technical systems for generating movement with the help of power transmission of gears and motors. In many industries, drive system are found in all machines and plants which contain moveable parts, such as pumps, fans, conveyor belts, and many others.

There are four different types of belts that can be distinguished: electric, hydraulic, pneumatic, or mechanical.

CONVEYOR TECHNOLOGY

Conveyor technology ensures efficient material flow within a company.

Thanks to the use of conveyor technology, materials, goods and finished products are transported efficiently. It serves as a link between operational processes - whether it is in production, processing, distribution, storage, or order picking - the conveyor technology ensures smooth processes.

Important components in conveyor technology are pulleys, rope sheaves, rope drums, traction sheaves, steel chains, link chains, sprockets and chain drums, conveyor belts, wheels, and rails. Conveyor technology also includes in-plant transport systems, such as roller conveyors, rotary valves, conveyor belts, belt bucket elevators and belt conveyors, as well as vehicles and equipment, such as forklift trucks, platform trucks, cranes, automatic loading systems, driverless transport vehicles, workpiece conveyors, and vertical conveyors, such as lifting tables or belt lifters.

WEICON offers a whole range of products that can be used in drive technology and conveyor technology, which help to keep operational processes running smoothly. Whether it is in maintenance and care, lubrication, protection, or repair.

Our products are suitable for all kinds of drive systems - whether they are hydraulic, pneumatic, electrical, or mechanical.

With WEICON
things
keep moving!

Epoxy Resin Systems

PLASTIC METAL

WEICON Plastic Metal are 2-component epoxy resin systems. Ideal for fast, cost-efficient and durable repair, coating, bonding, and casting of various materials.

▶ fast and durable repairs

▶ bonding

▶ coating

▶ gap compensation and filling

Contour Spatula Flexy

For making:

- vibration dampers
- assembling jigs
- flexible seals
- rubber-like prototypes
- foundry models and moulds

For repairs on:

- conveyor belts
- solid rubber tyres
- conveyor rollers

For coatings on:

- rollers
- centrifuges
- polishing drums
- pouring containers
- chutes and funnels
- dry and wet mixers
- pumps
- housings
- cyclones
- tanks
- loading beds

WEICON Urethane is also perfect as vibration or insulating protection for machines.

WEICONLOCK®

Additional Products

WEICONLOCK Activator F

Reducing the curing time

The activator is required for all passive surface, for low ambient temperatures (less than +10°C/+50°F), and for large gaps. On non-metallic surfaces, WEICONLOCK can only fully cure when the activator is used.

1-COMPONENT ADHESIVES AND SEALANTS

CYANOACRYLATE ADHESIVES

WEICON **Contact** are solvent-free instant adhesives.

They connect various materials, e.g. metal, glass, wood, plastic, ceramic, leather, and rubber, within seconds.

ELASTIC ADHESIVES AND SEALANTS

BLACK-SEAL

Black-Seal Special Silicone

Extremely resistant against oil and grease

WEICON Black-Seal is black, high-temperature-resistant (+280°C/+536°F), free of solvents, strong, oil-resistant, grease-resistant, pressure-resistant, resistant to ageing and extremely elastic (breaking elongation of approx. 500%).

Black-Seal is suitable for bonding and sealing in applications where particularly high oil and grease resistance is required.

The product can be used on gearbox, valve and casing covers, oil sumps, water pumps, gears and axles, flanges, tanks and containers, and in many other areas.

Gasket Maker

Permanently elastic special sealant

WEICON Gasket Maker is a strong and permanently elastic special sealant that cures with air humidity and practically without shrinkage.

Gasket Maker shows very good adhesion to steel, aluminium, glass, ceramic, and many other materials. The special sealant has an excellent temperature, oil and grease resistance, is resistant to pressure, ageing and UV radiation as well as permanently elastic.

Gasket Maker can be used on engines and water pumps, gears and axles, oil sumps, and in many other applications.

WEICON TOOLS®

We have been developing, producing and distributing high-quality stripping tools since 1967.

We present these tools at various trade fairs all around the world every year. At these events, the direct exchange with users, who tell us about innovations in their applications, gives us ideas and inspiration for new or improved WEICON TOOLS®.

This exchange sparks a process that keeps leading to product innovations and modifications, so we can offer our customers perfectly designed and state-of-the-art stripping tools.

No. S 4 - 28 Multi

Stripping function integrated in the housing

- stripping of all stranded and solid conductors with a cross-section between 0.5 and 6 mm²
